

Project Dissemination and Exploitation

From EU, IEA, UNDP projects to international decarbonisation or energy transition initiatives

Leverage global industry network EEIP – 130.000 and growing

Dissemination

Activities

- Communication of milestones, reports and events into entire EEIP industry and policy network
- Use of EEIP calendar, blog, mailing service and content marketing functionalities
- Multi-channel communication (EEIP social media, website, newsletter, blog, print)

Reporting

- **We prepare EU ready reports!**

Exploitation

Challenge

- An exploitation strategy is a key requirement for many projects.

But it is hard to follow up after a (funded) project ends.

Our solution

- We integrate your project after completion into an EEIP workstream including frequent communication and tracking
- We maintain a dedicated project website inside EEIP with your reports / project results for **at least 5 years following end of project**

Pricing : depends on scope and duration of support

Accounting: „direct costs“, subcontracting or partnership
